AKTIVITAS 5

1. Buat Resource Controller: php artisan make:controller MahasiswaController --resource --model=Mahasiswa

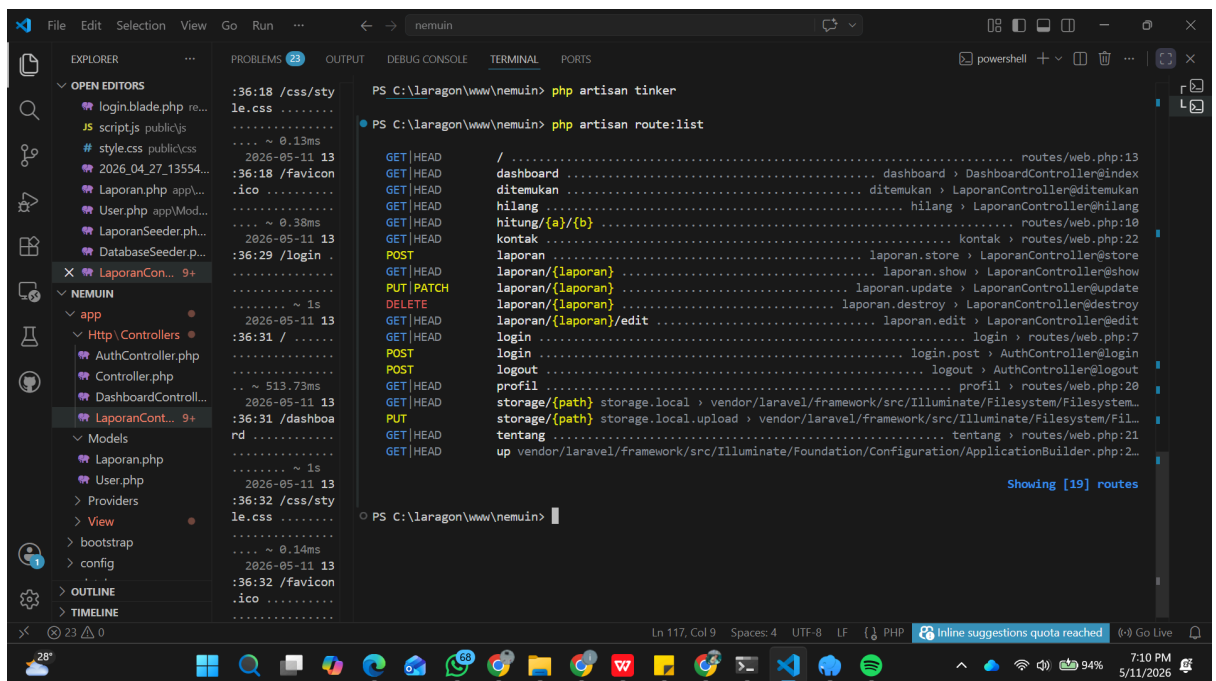

The screenshot shows the Visual Studio Code editor with the file explorer on the left. The file explorer shows the project structure: `database/seeds`, `DatabaseSeeder.php`, `User.php`, `LaporanSeeder.php`, `DatabaseSeeder.php`, and `LaporanController.php`. The `DatabaseSeeder.php` file is open in the editor, showing the following code:

```
10 class DatabaseSeeder extends Seeder
11 {
12     use WithoutModelEvents;
13
14     /**
15      * Seed the application's database.
16      */
17     public function run(): void
18     {
19         $this->call([
20             LaporanSeeder::class,
21         ]);
22
23         User::factory()->create([
24             'name' => 'Test User',
25         ]);
26     }
27 }
```

The terminal at the bottom shows the command `php artisan make:controller LaporanController --resource --model=Laporan` being executed, resulting in an error: `ERROR Controller already exists.`

2. Daftarkan di routes/web.php: Route::resource('mahasiswa', MahasiswaController::class)

The screenshot shows the Visual Studio Code editor with the file explorer on the left. The file explorer shows the project structure: `login.blade.php`, `script.js`, `style.css`, `2026_04_27_13554...`, `Laporan.php`, `User.php`, `LaporanSeeder.php`, `DatabaseSeeder.php`, `LaporanCont...`, `NEMUIN`, `app`, `Http\Controllers`, `AuthController.php`, `Controller.php`, `DashboardControll...`, `LaporanCont...`, `Models`, `Laporan.php`, `User.php`, `Providers`, `View`, `bootstrap`, `config`, `OUTLINE`, and `TIMELINE`. The `routes/web.php` file is open in the editor, showing the following code:

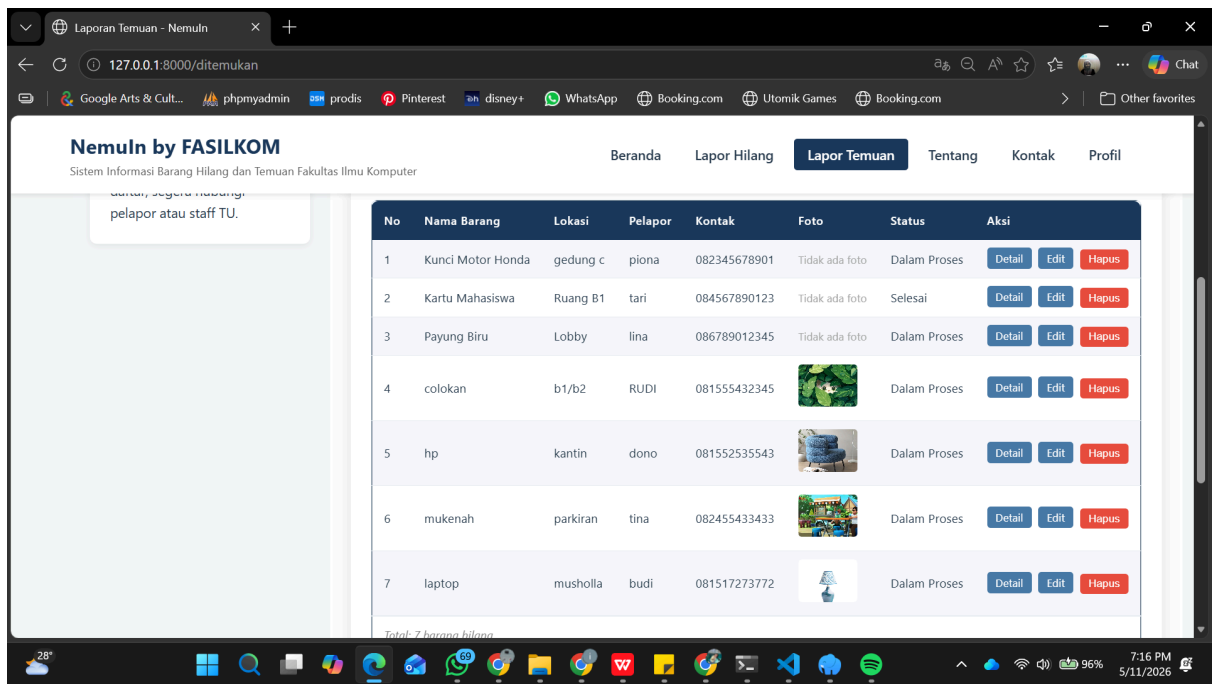

```
13 dashboard ..... dashboard ..... DashboardController@index
14 ditemukan ..... ditemukan ..... LaporanController@ditemukan
15 hilang ..... hilang ..... LaporanController@hilang
16 hitung/{a}/{b} ..... routes/web.php:10

29 tentang ..... tentang ..... routes/web.php:21
30 up ..... up ..... vendor/laravel/framework/src/Illuminate/Foundation/Configuration/ApplicationBuilder.php:2...
```

The terminal at the bottom shows the command `php artisan route:list` being executed, resulting in the following output:

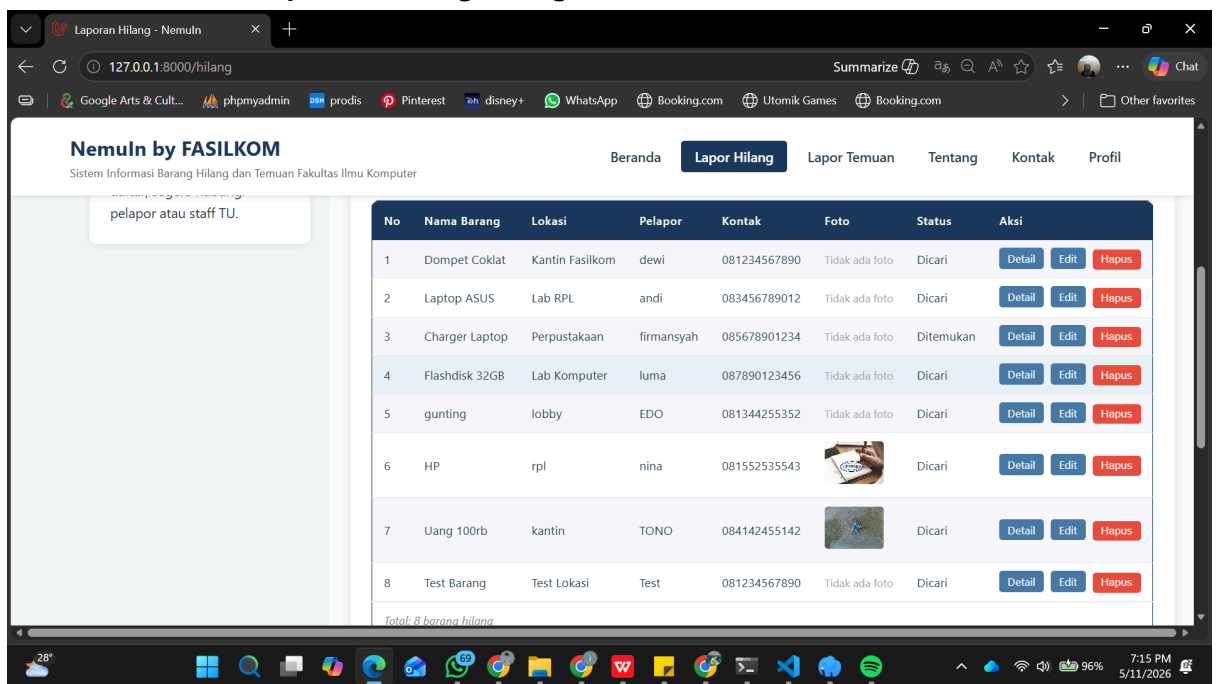

```
GET|HEAD / ..... routes/web.php:13
GET|HEAD dashboard ..... dashboard ..... DashboardController@index
GET|HEAD ditemukan ..... ditemukan ..... LaporanController@ditemukan

```

Edit Kembali

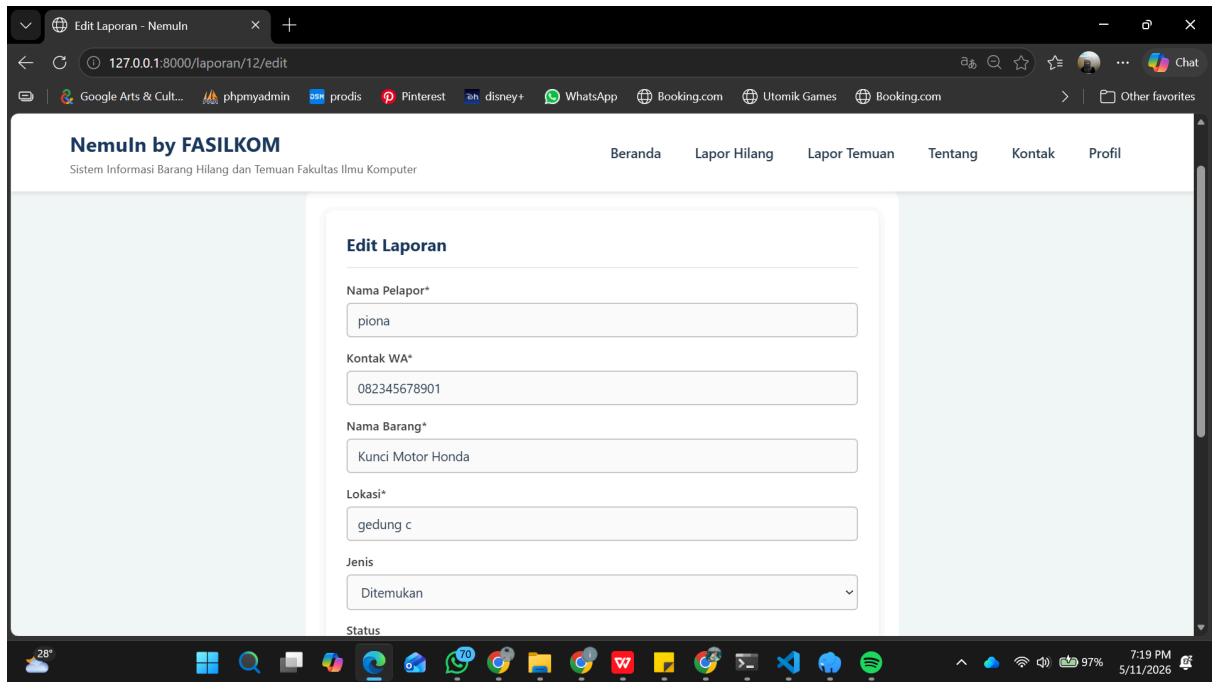

- Implementasi method `index()` — ambil semua mahasiswa dengan `paginate(10)` dan tampilkan ke view

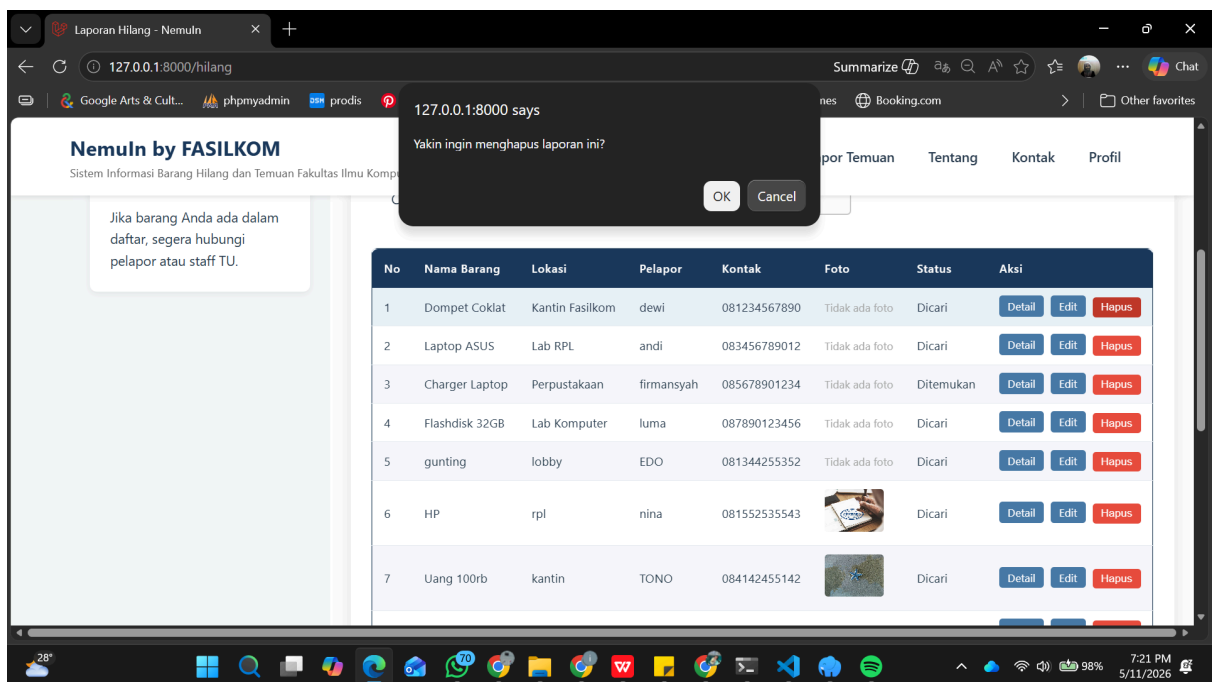

5. Implementasi create() dan store() — dengan validasi nim (unique), nama (min:3), email (email|unique), jurusan (in:SI,TI,MI)

6. Implementasi edit() dan update() — tampilkan form dengan old() atau \$mahasiswa->field, validasi unique kecuali ID ini

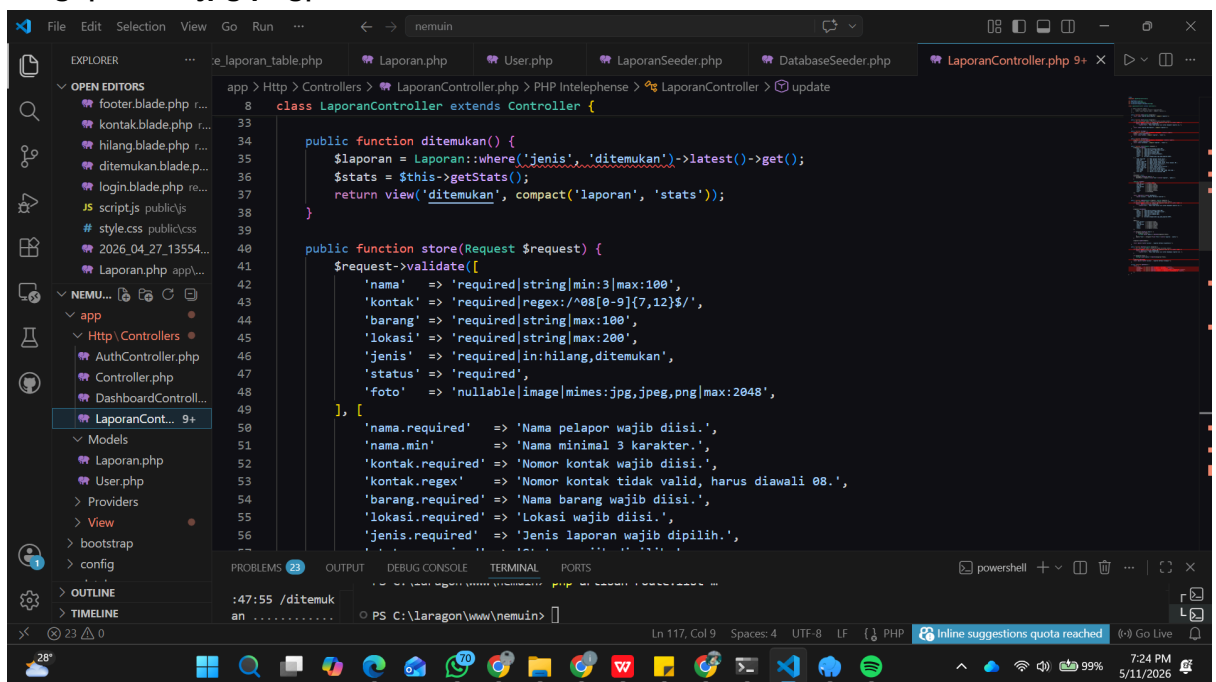

7. Implementasi destroy() — dengan konfirmasi JavaScript sebelum hapus

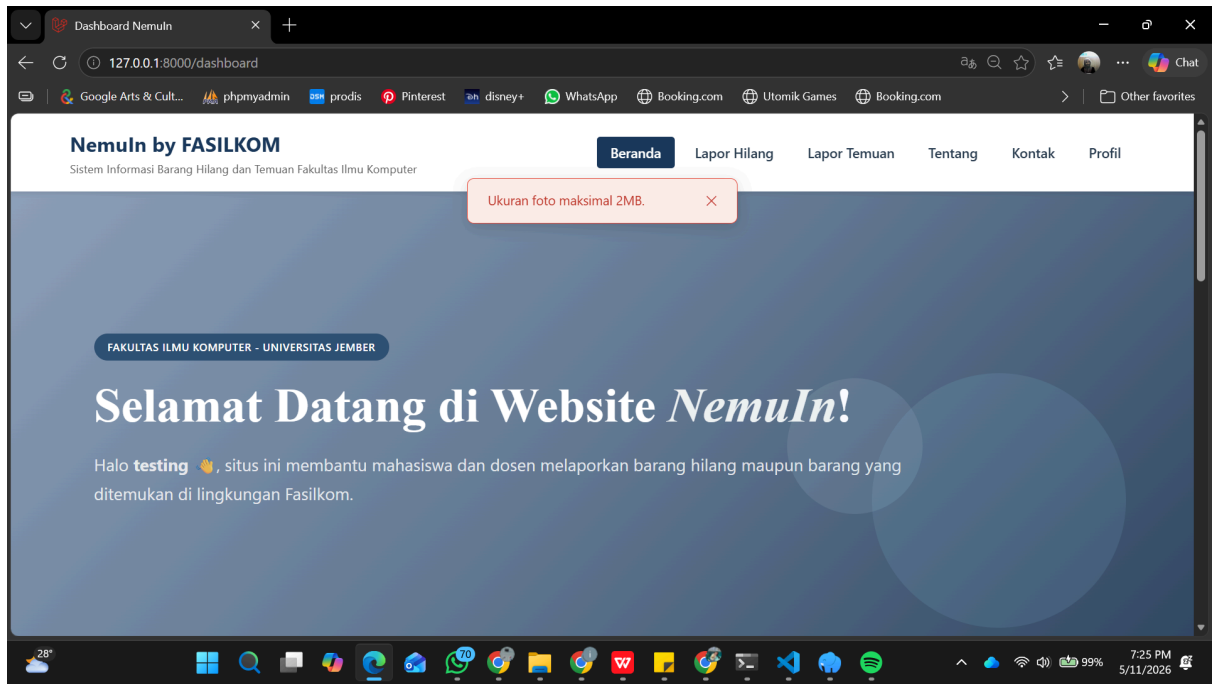

8. Tambahkan flash message di layout dan tampilkan session('success') / session('error')

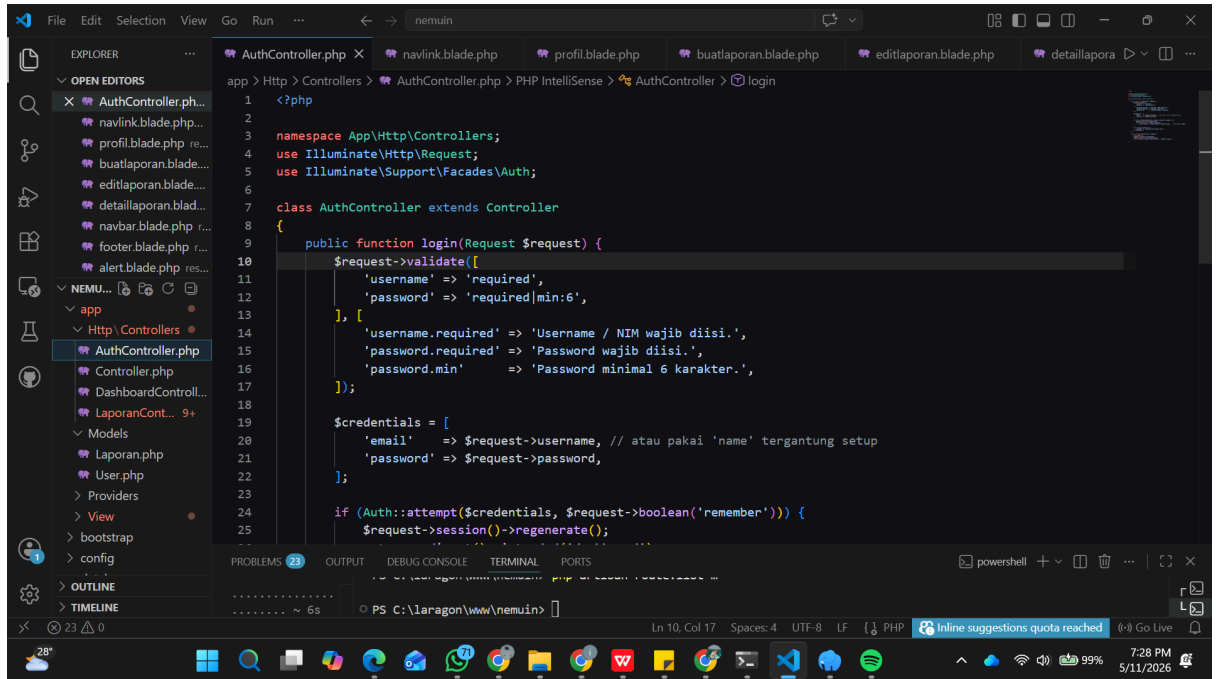

9. BONUS: Tambahkan fitur upload foto profil dengan validasi image|mimes:jpg,png|max:2048

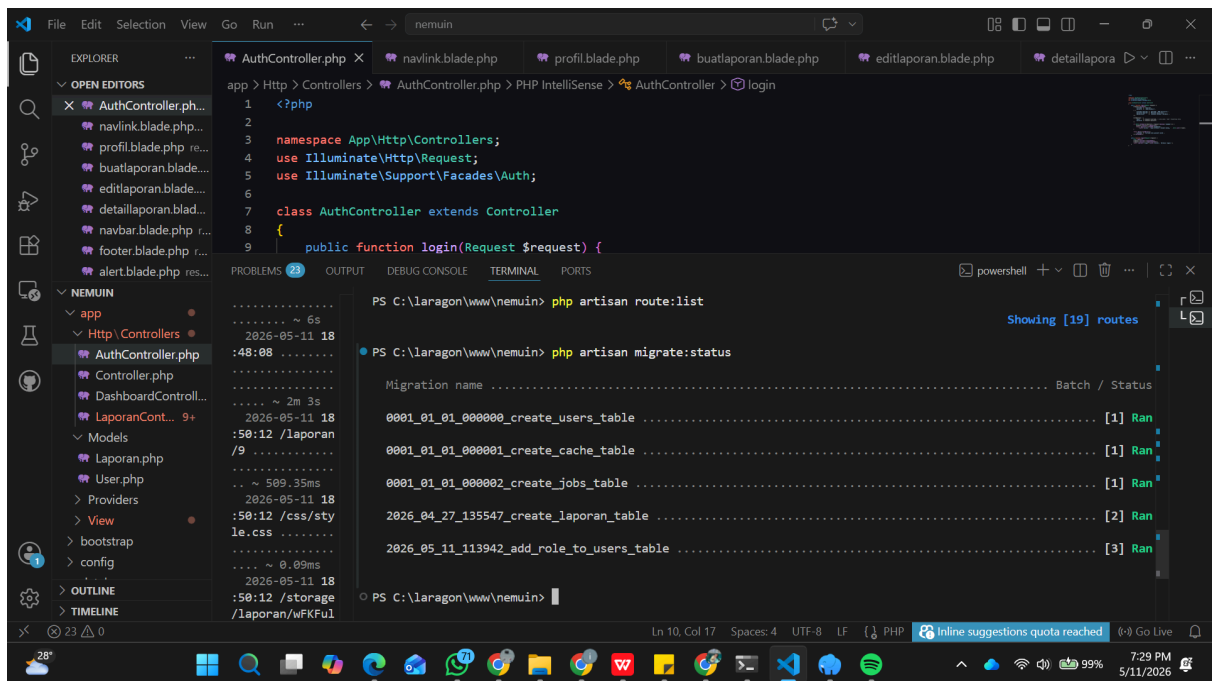

AKTIVITAS 6

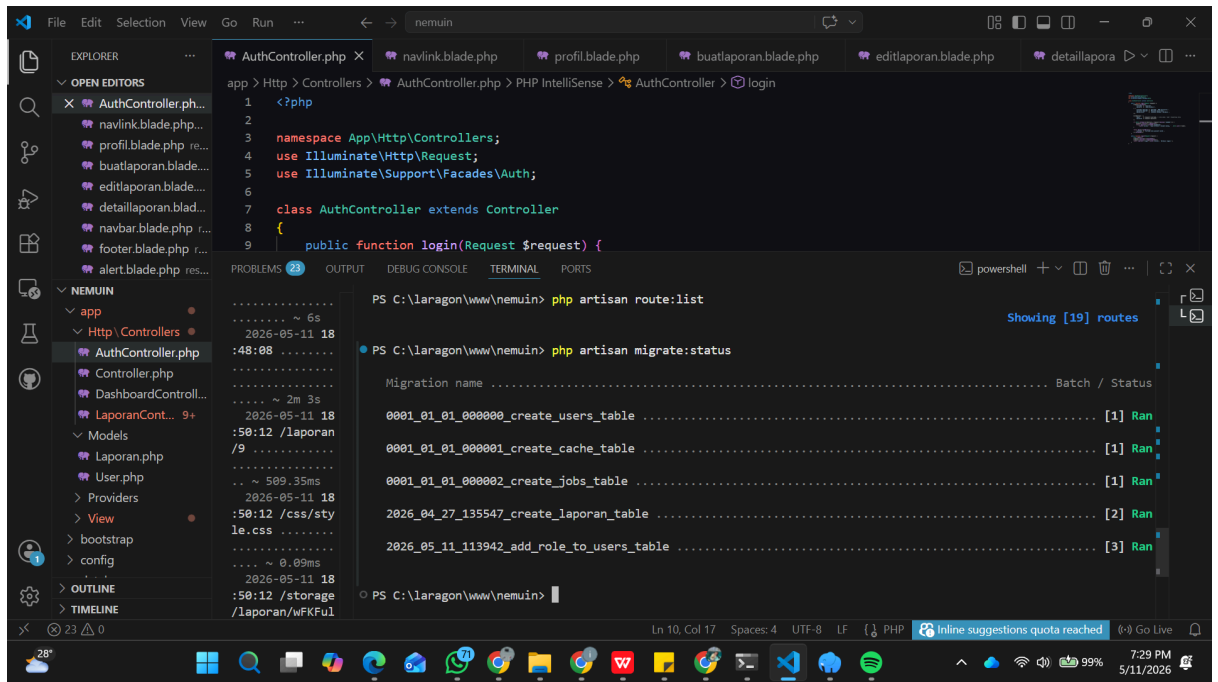

1. Instal Laravel Breeze: composer require laravel/breeze --dev, kemudian php artisan breeze:install blade

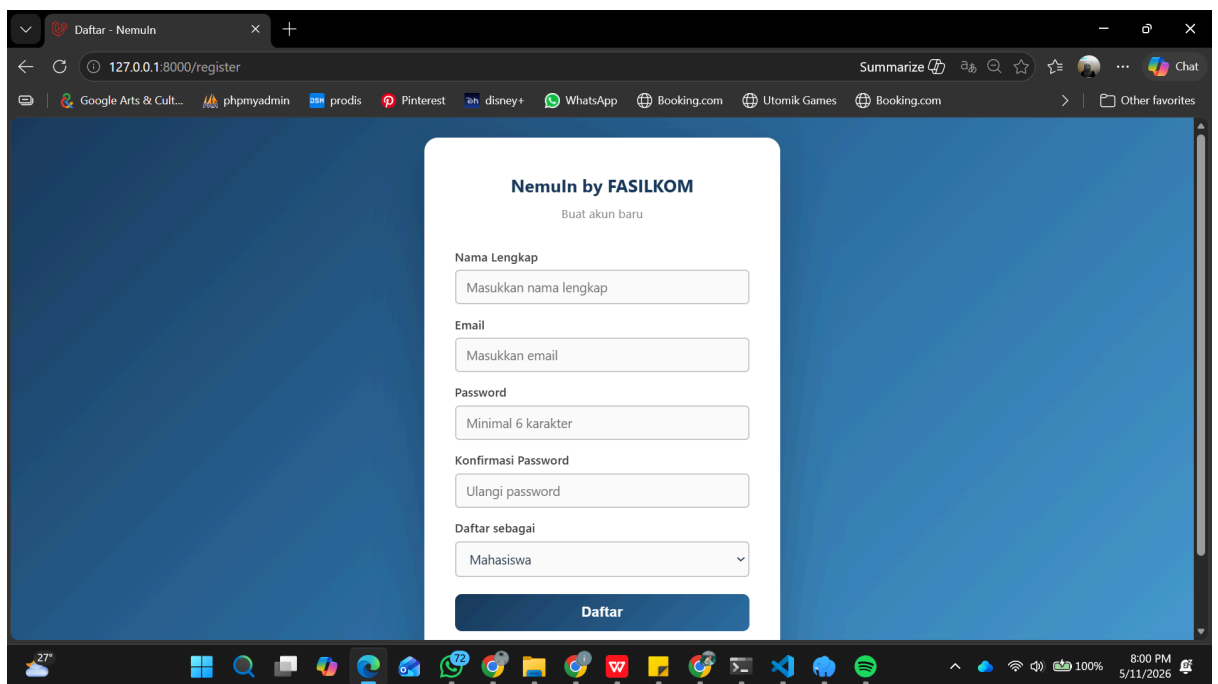

2. Jalankan php artisan migrate untuk membuat tabel users

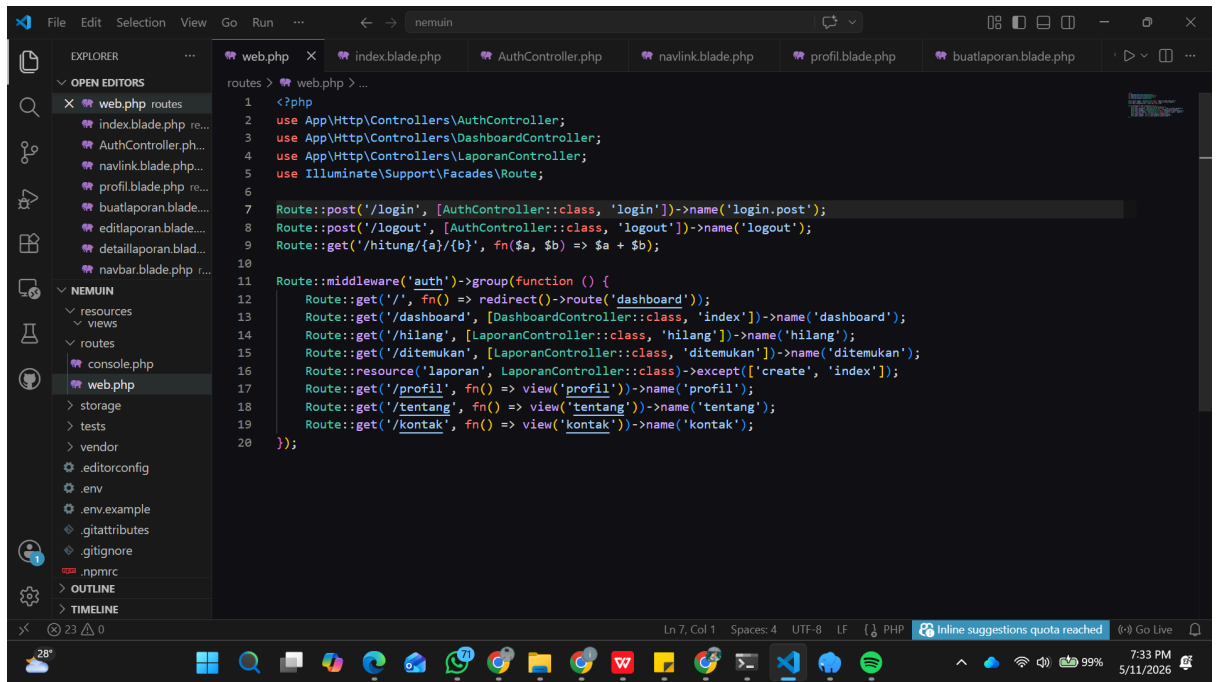

3. Jalankan npm install && npm run dev untuk build assets

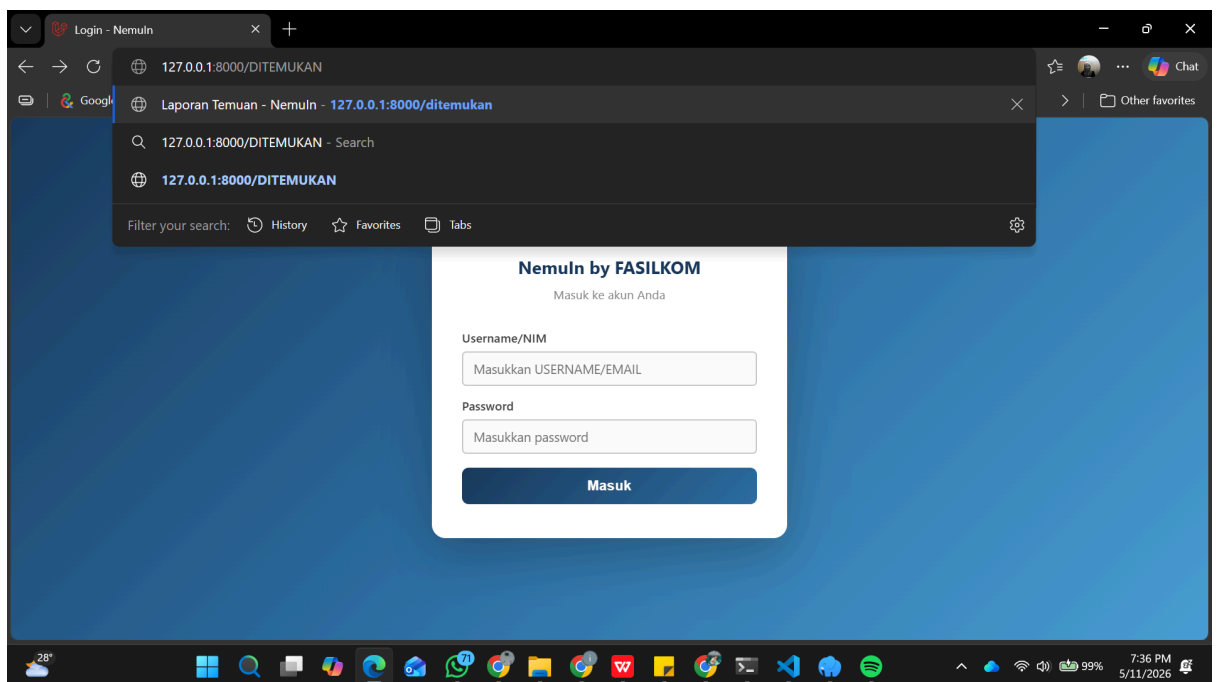

4. Coba register dan login di <http://127.0.0.1:8000/register>

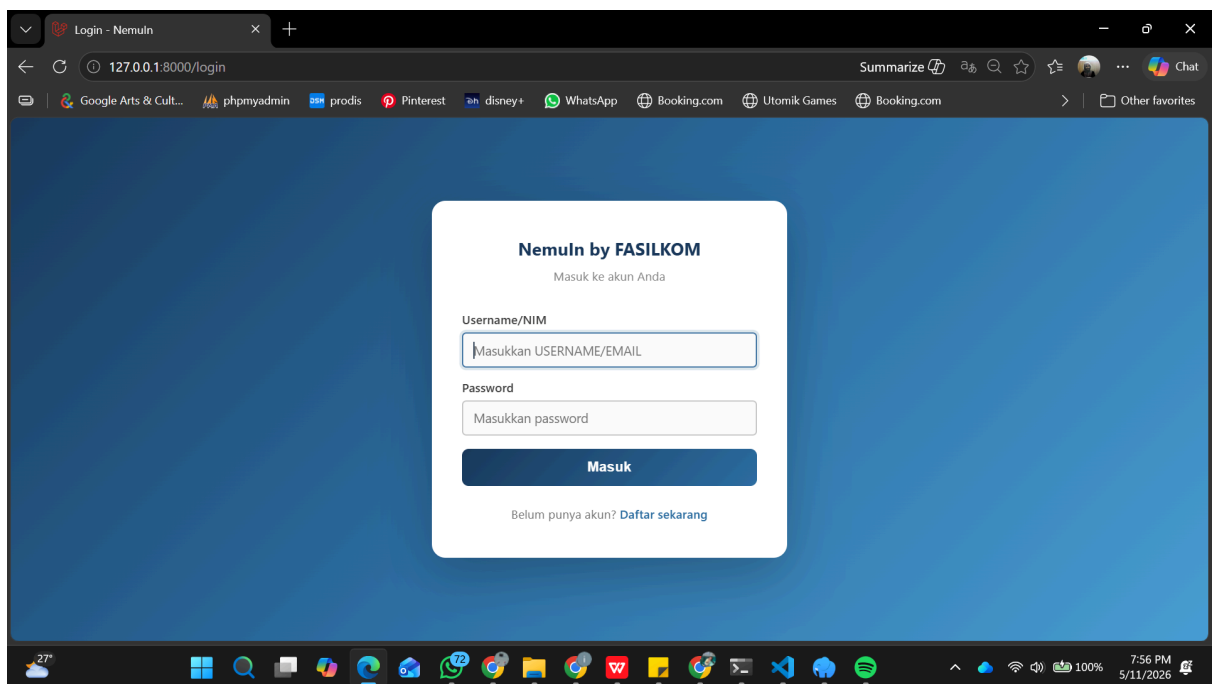

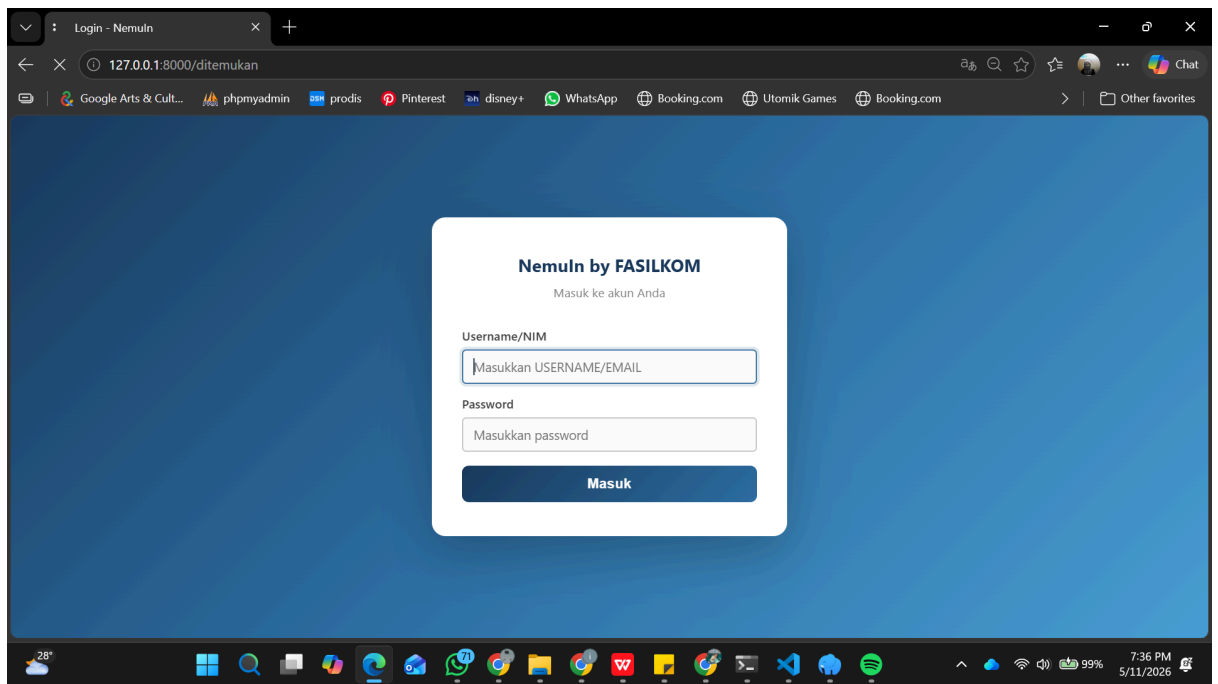

5. Amankan semua route mahasiswa dengan middleware auth: Route::middleware('auth')->resource('mahasiswa', MahasiswaController::class)

6. Coba akses /mahasiswa tanpa login — pastikan diredirect ke halaman login

7. Tambahkan nama user di navbar: `{{ auth()->user()->name }}`

```

# style.css 2026_04_27_135547_create_laporan_table.php Laporan.php User.php 1 navbar.blade.php ...partials X LaporanSeeder.php

8. Buat custom middleware CekAdmin yang hanya mengizinkan user dengan role 'admin' mengakses route tertentu

```
1 <?php
2
3 namespace App\Http\Middleware;
4
5 use Closure;
6 use Illuminate\Http\Request;
7 use Symfony\Component\HttpFoundation\Response;
8
9 class CekAdmin {
10     public function handle(Request $request, Closure $next) {
11         if (!auth()->check() || auth()->user()->role !== 'admin') {
12             return redirect('/dashboard');
13             ->with('error', 'Akses ditolak! Hanya admin yang diizinkan.');
```

9. **BONUS: Modifikasi index() Controller agar hanya menampilkan data yang dibuat oleh user yang sedang login**
- Untuk user_id 3 sebagai user mahasiswa jika yang ditampilkan sesuai dengan inputan dari user yang login saja

b. Kondisi ketika semua data ditampilkan tanpa id sebagai pembeda untuk ditampilkan
